Summary

Emergency Management and Homeland Security student with experience in GIS analysis, emergency preparedness, and public safety operations. Skilled in ArcGIS Pro, spatial analysis, hazard mapping, and risk assessment, with hands-on experience supporting emergency planning, field data collection, and resilience-focused projects. Strong background in leadership, interagency collaboration, and data-driven decision-making.

Skills

- ArcGIS Pro & Spatial Analysis
- Hazard Mitigation & Risk Assessment
- Emergency Action Planning (EAP)
- Crisis Response Coordination
- Geospatial Data Management
- Cartographic Visualization
- RStudio & Data Visualization
- Trimble GPS & Field Surveying

Experience

University Of New Hampshire |
Durham, New Hampshire
GIS Intern
01/2026 - 05/2026

- Conducted field surveys and collected spatial data to support a campus-wide signage inventory project.
- Edited and updated campus GIS maps in ArcGIS Pro to improve signage tracking and spatial data accuracy.
- Created maps and cartographic products to support data visualization and campus planning initiatives.
- Organized and maintained GIS databases to enhance accessibility and long-term data management.

City Of Portsmouth | Portsmouth,
New Hampshire
Recreation Intern
06/2025 - 08/2025

- Coordinated planning and implementation of recreational activities for youth, enhancing engagement and participation.
- Supported recreation programming and facility operations, ensuring participant supervision and emergency preparedness while fostering team coordination.
- Collaborated with city public safety and health officials to learn emergency response protocols and apply them to recreation-based emergency action planning.

Education

University of New Hampshire | NH
Bachelor of Science in Homeland Security
Expected in 12/2026

- Dean's List, Fall 2022 - Fall 2023
- Minors: Emergency Management & Corporate Security
- Disaster Resilience Capstone Project: Developed a GIS-based mitigation plan for Erie County, NY to reduce natural hazard risks through data-driven analysis and cost-effective resilience strategies.
- Undergraduate Research Conference: "Looking at Socio-Political Attitudes Toward Climate Change" — Used survey data in RStudio to analyze how political identity, media attention, and demographics influence climate change perceptions through statistical analysis and data visualization.

Projects

- Evaluating County-Level Hurricane Helene Preparedness and Impact
- Used ArcGIS Pro and external research to analyze Hurricane Helene's impacts, community vulnerability, disaster resilience, and emergency response strategies.
- Emergency Management Plan Project For Local New Hampshire Hospital
- Conducted hospital risk assessments for hazards including flooding, snowstorms, power outages, and active shooter incidents; developed preparedness and continuity plans focused on patient safety and operational resilience.
- Security Plan for the August 13th, 2028 Olympic Marathon in Los Angeles
- Developed a multi-layered security and emergency management strategy, including threat assessments, crowd management, medical readiness, and public safety coordination.

Leadership & Involvement

- Alpha Xi Delta: Newsletter Chair, DEI Committee Member, New Member Orientation Director, and Sisterhood Chair.
- Security Studies & Intelligence Student Organization: Events Coordinator.

Certifications & Licenses

- FEMA Independent Study Certifications
- ESRI ArcGIS & ArcGIS Pro Certifications – Geospatial analysis, data management, and cartographic visualization
- Texas A&M Engineering Extension Service (TEEX): EU AWR408 0052; LS AWR401 0053
